

**Send it Clear
Fancy Card**
By Leah Crowe

1. To start, I pulled the protective film from the front of the middle panel, and the back of the front panels. Before any paper is added, its best to adhere the panels together with included adhesive circle tape.

2. A trick is to fold the paper halfway down to reveal the glue without touching it, then carefully adhere it between the two meeting panels. Do this between all the panels to adhere them together.

3. Attach a cute sentiment pattern to the middle panel.

4. Grab your chipboard sentiment and paint it with your favorite chalk paint. While this dries, finish up decorating your acrylic card.

5. (Remove protective film from the front sides of the top panels) Since I'm using the Photoplay Paprika collection, I select a couple of stickers to add to the bottom front panel of the card. On the top scallop panel, trim a piece of paper to $1 \frac{3}{4} \times 5 \frac{1}{2}$ "and adhere on the backside of the panel so it shows through to the top. Then adhere a piece of ribbon along the front of the scallop.

6. Adhere the Blessed chipboard to the front of the card and add any other embellishments you wish to add.
